

Nathan Janes Releases Collaborative Work "Puggle Sam"

Activist artist Nathan Janes has released his latest work titled "Puggle Sam," a collaborative work of paint and glass mosaic completed with 'Mixed Up Mosaics' of New York. In this work, Uncle Sam, once employed as a recruitment tool for World War I, scolds Americans for allowing our once great republic to slip into a state of despotism. In an article written to accompany the painting, Janes addresses the loss of liberties that have occurred within the United States since September 11, 2001. According to Janes, his latest piece has been created to remind Americans of their rights and the distractions used by the establishment in their grab for power over the people of this country. The artwork and article are among many works completed by Janes that address national and international concerns. To view additional works of Janes visit www.pupaganda.com.
